CONTENTS OF VOL. XXI (Nos. 1-6)

NUMBER 1—JANUARY

	Page
Minimal-order optimal filters for discrete-time linear stochastic systems. T. YOSHIKAWA	1
Dynamic analysis of field energy systems using bond graphs. M. R. SALLEH and M. A. LAUGHTON	21
Explicit solution of a class of delay-differential equations. A. C. TSOI	39
Sampled-data linear-quadratic regulator for systems with generalized transportation lags. A. THOWSEN and W. R. PERKINS	49
Products of random sine waves. R. BARAKAT	67
Linear feedback design using matrix traces. J. O. FLOWER	73
Adaptive relay control of second-order systems. A. S. I. ZINOBER	81
Stability and the eigenvalues of $G(s)$. H. H. ROSENBROCK and P. A. COOK	99
New filtering and smoothing algorithms for discrete non-linear systems with time delays. D. F. LIANG and G. S. CHRISTENSEN	105
The search for 'uniform and equable motion'. A study of the early methods of control of the steam engine. S. BENNETT	113
A new result on eigenvalue assignment by means of dyadic output feedback. H. M. POWER	149
On the analysis of feedback systems with a polynomic plant. R. M. DESANTIS and W. A. PORTER	159
Corrigendum	176

NUMBER 2—FEBRUARY

A necessary condition for decoupling multivariable systems. M. E. WARREN and S. K. MITTER	177
On the computation of solutions of certain dynamic games. L. C. WESTPHAL and A. R. STUBBERUD	193
Identification of reduced models from noisy data. R. GENESIO and R. POMÈ	203
Deadbeat control of discrete-time systems using output feedback. H. SERAJI	213

Page

The synthesis of transfer-function matrices by output feedback. M. CREMER 225

Identifiability conditions for linear systems operating in closed loop. T. SÖDERSTRÖM, I. GUSTAVSSON and L. LJUNG 243

Linear system reduction using Pade approximation to allow retention of dominant modes. Y. SHAMASH 257

Minimal realization of a transfer function matrix in canonical forms. P. RÓZSA and N. K. SINHA 273

A practical criterion for the input–output stability of distributed parameter systems with space-dependent coefficients. G. JUMARIE 285

Minimum-effort time-optimal control of linear discrete systems. M. E. RASMY and M. H. HAMZA 293

Optimal scanning control of parabolic systems. J.-C. E. MARTIN 305

Singular problems in optimal control—a survey. D. J. BELL 319

A general Liapunov function for multi-machine power systems with transfer conductances. U. GUDARU 333

Research note:

Liapunov functions for power systems. U. GUDARU 345

Correspondence:

Comment on C. D. Johnson's paper 'State overdescription and uncontrollability of dynamical systems'. H. H. ROSENBROCK 347

Book review 351

NUMBER 3—MARCH

Desensitizing algorithms for state-restrained optimal control assessments J. F. LOWINGER and J. A. GIBSON 353

A method for the evaluation of limit cycles. D. P. ATHERTON and N. RAMANI 375

The inverse multiple input describing function problem. D. P. ATHERTON 385

Error analysis of fixed-point prediction with coloured measurement noise. M. NAGATA and Y. SAWARAGI 391

Non-Lyapunov stability analysis of large-scale systems on time-varying sets. L. T. GRUJIĆ 401

Sensitivity and error analysis algorithms for combined estimation and control systems. G. W. CARLOCK and A. P. SAGE 417

The structure of decoupled non-linear systems. E. FREUND 443

Uniform decoupling and stabilization by output feedback. N. VISWANADHAM 451

On composite systems that preserve the degrees of their subsystems. A. C. PUGH 465

Page

Model reduction using the Routh stability criterion and the Padé approximation technique. Y. SHAMASH 475

Design of cascade controllers for zero assignment in multivariable systems. H. SERAJI 485

Cyclicity of linear multivariable systems. H. SERAJI 497

Time-optimal control of a certain second-order plant with restricted phase coordinates. E. D. EYMAN and M. B. SUBRAHMANYAM 505

Random-seeking methods for the stochastic unconstrained optimization. J. KORONACKI 517

NUMBER 4—APRIL

Design of decoupled control systems. A frequency domain approach. S. H. WANG and E. J. DAVISON 529

On the computation of minimal indices for linear multivariable systems. S. H. WANG, P. DORATO and E. J. DAVISON 537

On the design of dynamic output feedback regulators for linear systems. R. A. MILLER 545

The behaviour of optimal Lyapunov functions. D. N. SHIELDS and C. STOREY 561

A heuristic approach to the hierarchical control of multivariable serially connected dynamical systems. M. G. SINGH and J. F. COALES 575

A new algorithm for the on-line multi-level control of large interconnected systems with fast dynamics. M. G. SINGH 587

On zeros of multivariable systems. R. V. PATEL 599

Optimal control of linear systems with a modified quadratic performance index. G. S. MUELLER and M. J. WANG 609

The discrete Euler equation on the normed linear space l_n^1. Y. BAR-NESS 625

Relationships between Tsypkin, Hamel and approximate limit cycle analyses. F. F. JUDD 641

Singular perturbation analysis of the transfer function matrices of a class of multivariable linear systems. B. PORTER and A. T. SHENTON 655

Optimal pole placement in linear multivariable systems using dynamic output feedback. H. R. SIRISENA and S. S. CHOI 661

An innovation approach to the reduction of the dimensions in a multivariable stochastic system. T. SUBBA RAO 673

Application of the sensitivity points method to a linear predictor control system. B. GARLAND and J. E. MARSHALL 681

Least-squares identification of closed-loop systems. P. E. WELLSTEAD and J. M. EDMUNDS 689

Correspondence:

Comment on the paper "Simplification of z-transfer functions by continued fractions". K. J. KHATWANI and J. S. BAJWA 701

Book review 703

NUMBER 5—MAY

Page

Stochastic adaptive control methods: a survey. B. WITTENMARK 705

Constrained linear filter and its relation to singular optimal control. S. VATHSAL and I. G. SARMA 731

The zero crossing variance of the smoothed random telegraph signal. J. T. RICKARD and R. F. PAWULA 743

A three-stage design of non-linear control systems with time-delay. M. JAMSHIDI 753

Optimal control via collocation and non-linear programming. T. H. TSANG, D. M. HIMMELBLAU and T. F. EDGAR 763

Time-optimal control through a classical approach. H. C. LIM 769

Iterative algorithm for the minimum fuel and minimum amplitude problems for linear discrete systems. L. KOLEV 779

Optimum regulation of sampled-data processes. P. H. PHILLIPSON ... 785

An extension of the predictive Min-H method to multivariable control. W. SEW HOY and J. A. GIBSON 795

A non-linear filter with higher-order weighting functions via invariant imbedding. M. SUGISAKA and S. SAGARA 801

On observers for systems with unknown and inaccessible inputs. C. D. JOHNSON 825

Feedback control of a class of linear discrete systems with jump parameters and quadratic cost criteria. W. P. BLAIR, JR. and D. D. SWORDER 833

Insensitivity of optimal linear discrete-time regulators. S. BARNETT ... 843

Some applications of the comrade matrix. S. BARNETT 849

On certainty equivalence of stochastic optimal control problem. H. AKASHI and K. NOSE 857

Stability of single sign integral pulse frequency modulation control systems. P. J. JOSEPH and G. F. INBAR 865

Correspondence:

First-passage time for envelope crossing for a linear oscillator. W. LENNOX 879

NUMBER 6—JUNE

Walsh series analysis in optimal control. C. F. CHEN and C. H. HSIAO 881

Absolute stability results for non-linear systems using logarithmic plots. D. P. GARG and O. MAIZZA-NETO 899

New results in feedback modal-controller design. P. N. PARASKEVOPOULOS and S. G. TZAFESTAS 911

On a direct method for optimization of stochastic distributed parameter systems. S. E. AIDAROUS 929

Pole assignment techniques for multivariable systems using unity rank output feedback. H. SERAJI 945

Page

An approach to dynamic compensator design for pole assignment. H. SERAJI 955

Application of series approximation to the analysis of a CSTR with time-delay. R. LUUS and R. MUTHARASAN 967

The estimation of factor scores and Kalman filtering for discrete parameter stationary processes. M. B. PRIESTLEY and T. SUBBA RAO 971

Non-linear design for cost of feedback reduction in systems with large parameter uncertainty. I. HOROWITZ and P. ROSENBAUM 977

Optimal location of process measurements. W. H. CHEN and J. H. SEINFELD 1003

An exact solution for oscillations in relay systems with complex poles. D. P. ATHERTON and S. K. CHOUDHURY 1015

Correspondence:

Analytical determination of limit cycles for a class of third-order non-linear system. D. P. ATHERTON 1021

On output feedback control. V. LOVASS-NAGY and D. L. POWERS 1025

Subject index 1029

Author index 1033
